

aopp_deconv_tool.optimise
_compat.PriorParamSet.all_params

aopp_deconv_tool.optimise
_compat.PriorParamSet.consts

aopp_deconv_tool.optimise
_compat.PriorParamSet.constant_params

```
graph LR; A[aopp_deconv_tool.optimise  
_compat.PriorParamSet.all_params] --> C[aopp_deconv_tool.optimise  
_compat.PriorParamSet.constant_params]; B[aopp_deconv_tool.optimise  
_compat.PriorParamSet.consts] --> C;
```

The diagram illustrates a mapping from two source parameter sets to a single target parameter set. On the left, there are two white rectangular boxes. The top box contains the text 'aopp_deconv_tool.optimise' followed by '_compat.PriorParamSet.all_params' on the next line. The bottom box contains 'aopp_deconv_tool.optimise' followed by '_compat.PriorParamSet.consts' on the next line. On the right, there is a single gray rectangular box containing 'aopp_deconv_tool.optimise' followed by '_compat.PriorParamSet.constant_params' on the next line. Two blue arrows point from the right side of the top white box to the left side of the gray box, and from the right side of the bottom white box to the left side of the gray box.
