

aopp_deconv_tool.plot
_helper.base.Base.iter_ax

aopp_deconv_tool.plot
_helper.base.Base.on
_attach_ax

aopp_deconv_tool.plot
_helper.base.Base.is
_ax_attached

```
graph LR; A[aopp_deconv_tool.plot_helper.base.Base.iter_ax] --> C[aopp_deconv_tool.plot_helper.base.Base.is_ax_attached]; B[aopp_deconv_tool.plot_helper.base.Base.on_attach_ax] --> C;
```

The diagram illustrates a relationship between three code snippets. On the left, there are two white rectangular boxes. The top box contains the text 'aopp_deconv_tool.plot_helper.base.Base.iter_ax'. The bottom box contains the text 'aopp_deconv_tool.plot_helper.base.Base.on_attach_ax'. On the right, there is a gray rectangular box containing the text 'aopp_deconv_tool.plot_helper.base.Base.is_ax_attached'. Two blue arrows point from the right side of the two white boxes to the left side of the gray box, indicating that the two methods on the left are related to or perhaps call the method on the right.
